### Natural Cleaning Tips

1. *Using Baking Soda as a scrub* - this common household item is 89 cents a box and is a natural deodorizer. Just add water to create a paste. If a liquid scrub is what you desire, just add more water and store it in a plastic squeeze bottle. You can use this mixture to scrub your tub, your bathroom sink, your toilet, your kitchen sink, pots and pans or anything you would normally use a scouring brush for. Add a few drops of a favorite essential oil like grapefruit for a wonderful fragrance.
2. 1 part vinegar and 3 parts water is an easy solution to clean your glass and windows and also your engagement ring! Do not add fragrance oils to vinegar solutions.
3. Tea Tree oil, eucalyptus oil, peppermint oil and rosemary oil are all essential oils that contain natural antibacterial properties. Add a few drops to natural unscented hand soap from the health food store to create a natural anti-bacterial soap. Most mass brands use a lot of alcohol which kills germs, but also dries out your skin. As you know, The Good Home Company chooses to not use antibacterial ingredients in our products as it is our opinion that they can inhibit your immune systems natural germ fighters.
4. Grind a quarter of a lemon, orange or grapefruit into your garbage disposal to clear out food odors.
5. Sprinkle a handful of lavender petals into a litter box to add
