Spray Paint Frames

Gold and silver spray paint are two of my favorite ways to spruce up anything. Here I did a whole bunch of frames I bought at a dime store for three or five dollars. The spray paint makes them elegant enough to put on any wall. Just get a variety of different sizes in the same shape for the look pictured here.

Materials:

Cheap wood picture frames
Silver and gold flat spray paint

Total Time: 10 minutes for each frame

Total Cost: \$2 to \$3 a frame

Directions: Take out the glass from the frames and spray paint them outside using a large piece of cardboard to catch the excess paint. Make sure you get the sides and corners sprayed. Let dry thoroughly before inserting the pictures.
